Following the success of our SmartLines scanner app we decided to go a step further and develop an innovative system. This is not just a scanner, a planner or a timetable - it is all of this and much more.

THE NEW SMARTLINES

The new Smartlines is an one-of-a-kind school assistant system that pairs Lipa Mill premium notebooks with an exclusive app to offer the best study experience ever.

www.smartlines.hr

HOW IT WORKS

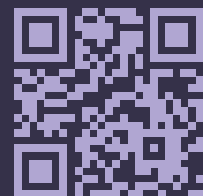

- 1 The app is downloaded through the QR code found in Lipa Mill notebooks.
- 2 The notebook's planner and schedule are filled in with the 3-letter codes provided, during class.
- 3 After the class the app is used to scan and import content to the user's digital planner & schedule, automatically generating notifications for each new task or event.

AN APP + A NOTEBOOK

The app uses *optical character recognition* (OCR) technology and is available in 16 languages.

The notebook features a planner+schedule to be filled in and then scanned by the app, that automatically generates digital versions of these tools.

This means students can quickly import content to their smartphones and receive notifications to do their homework and prepare for exams. They can also share everything with their classmates!

download the app
it also works without a notebook!
